PRESENTATION SUMMARY

Tuesday October 16th, 2018. Session 5

"LENGTH RESTRICTION IN CABLE TESTING"

By Peter Fischer

"Even if most of LAN cable standards, beside Cat8, use 100m as a reference length, question arise on how to interpret results when using other cable length either shorter (50m or 30m for example for LAN cables) or longer (like 305m or 500m or even few kilometres for telephone cables)..."

ACTUAL TOPICS

DATA CABLE MEASUREMENT

Cobalt - Vega

Data cables up to Cat 8, Cat6 and Cat6_A patch cords
"Balunless" or "Baluns" test methods supported
EMC measurements & Quad option

COAXIAL CABLE MEASUREMENT

Scorpius DT

new desktop system
with embedded VNA and PC

QUALITY DATA MANAGEMENT

CIQ for Industry 4.0

Quality data acquisition and evaluation
Continuous production monitoring

LET'S CELEBRATE

AESA Cortailod
1978 - 2018

During those 40 years, AESA has established trusted relationship with most cable manufacturers worldwide. We look forward to meeting you future challenges and to continuing thriving together.

OUR TEAM IN USA

Denis Milz

Sales Manager

Peter Fischer

R&D Project Manager
