

Open position: Electronic Engineer

Date: 2024.06.25

Title

Electronic Engineer / Ingénieur en Électronique

Company

AESA Cortailod is an international high-tech SME located in Switzerland, canton of Neuchatel, with offices in Germany and China. We develop and produce automatic test equipment (ATE) and solutions for the electrical cable industry, addressing multiple market segments, including telecom, energy, automotive, etc. In parallel, we supply quality integrated software towards yield improvement. Established more than 40 years ago, we pride ourselves on constant innovation and high quality-performance services to enhance our products and customer experiences. Exports account for 95% of our sales.

To further strengthen our R&D Department, we are looking for a young and motivated **Electronic Engineer**. This person will mainly be in charge of optimizing and further developing of our METIS software, as well as supporting customers on related requests. METIS is the dedicated embedded software to control and operate our test instruments to measure electrical parameters of cables.
