

Coaxial Universal Connector

Fast and reliable connection of your coaxial cable to the N-Type ports

DESCRIPTION

AESA has developed a patented method to easily connect any size of 50 ohms coaxial cable to the N-ports of Scorpius devices for example.

The preparation of the cable is very easy and fast. You just have to remove the outer insulation on a sufficient length.

Calibration artefacts are provided to ensure a correct calibration plan.

KEY FEATURES

- One fits all
- Easy to operate
 - Easy and fast preparation of the cable
 - Easy connection
- For any type of 50 Ohms coaxial cable
 - \varnothing 4 to 16 mm
- Patented method

AESA Cortaillod

TECHNICAL SPECIFICATIONS

Measuring range	No limitation, depends on test device
Diameter range	∅ 4 to 16 mm on shield
Components	<ul style="list-style-type: none"> • Base support plate • Set of chucks with different diameters to adapt to the cables • Connecting N-Cables • Calibration artefacts
Article No	50.0100.0019.00
